

OE-930

Advanced Electrical Gauge & Power Supply indicator Test Set

The OE- 930, Advanced Electrical Gauge & Power Supply indicator Test Set is an electrical kit that enables testing up to 5 units simultaneously for the required for operational status power supply, mainly during the manufacturing and maintenance stages.

With Tesoptics' Advanced Electrical Gauge & Power Supply indicator Test Set, this operation is fast, simple and easy.

The system operates using a self-contained rechargeable battery with extended operation life that allows for easy mobility and performance in the field.

The Test Set Kit goes through a quality control process to meet high standard manufacturing, performance and safety regulations.

KEY FEATURES

- / Capable of operating with a variety of NV devices
- / Operates on 5 units simultaneously
- / Timer Mode- for the routine maintenance of maintaining NVD's longevity
- / Easy to assemble and operate
- / Rechargeable battery
- / ITAR free

SYSTEM INCLUDES
